

Assignment #02 CS

Dev: Matthew E. Duffy

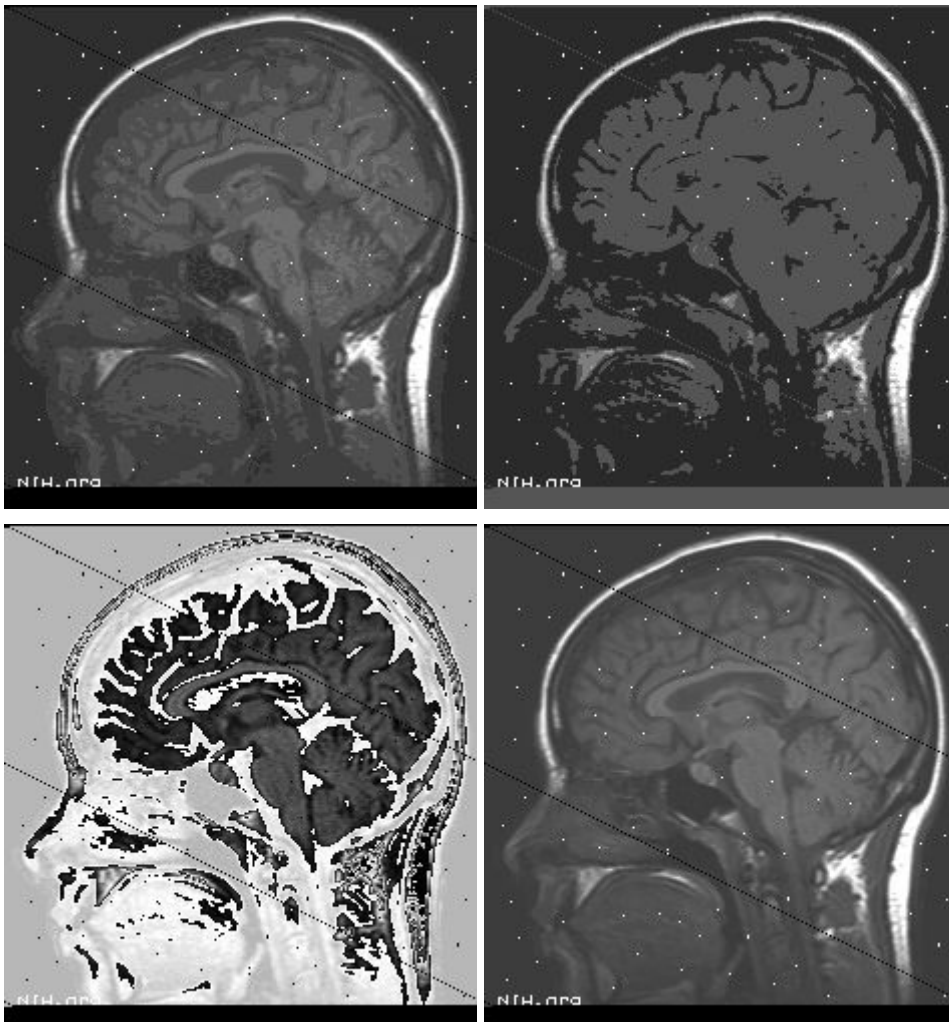

Problem Definition; try to use masks, and to improve image results.

Major problems that i had, was desideding what kind of containers to have my images move into.

Solutions;

For the data struc i setup a vector double into a `std::map`. With the ID index a match to the conversion of a 2d array into the 1d convertible, $(row*width+collom)$. This allowed flexibility.

results;

Model:
